DENTAL PACKAGES

Dental Clinic in Medworld's main purpose to give all patients all-inclusive dental travel. All our dental treatment offers include Panoramic X-Ray, 3D Tomography, Oral Examination, dental products, laboratory costs, dentist fees, and injections. Our dental clinics, which follow the developing technology and incorporate the latest innovations, focus on continuous patient satisfaction and provide quality, reliable and world-class treatment-oriented dentistry services. Taking care of Oral and Dental Health is an important investment for our general health needs. Oral and Dental Health is very important for both body health and a beautiful appearance. Oral and dental care should be done regularly and the dentist should be examined at least twice a year. Thus, the problems that may occur can be controlled with early diagnosis, and tooth and gum disorders can be intervened in advance. Do not forget that prevention is as important as treatment.

- ALL ON FOUR
- ALL ON SIX (FIXED DENTAL IMPLANT BRIDGE)
- METAL PORCELAIN CROWNS / FULL VENEERS
- ZIRCONIUM PORCELAIN CROWNS / FULL VENEERS
- E-MAX™ CROWNS / FULL VENEERS

ZIRCONIUM PORCELAIN CROWNS / FULL VENEERS

Our Cosmetic Dentists have a wealth of experience with the technology and will create a design that suits your mouth and face shape. This option consists of a white metal core with porcelain fused to the outside. Because the base is made of Zirconium, a naturally White metal, they will always appear white at the gum line. These crowns are also free of Amalgam and Nickel, and will therefore not cause health issues or require replacement.

LASER TEETH WHITENING PACKAGE

Laser whitening, also known as power whitening, which is another method of teeth whitening that is provided by a dentist, where the whitening product is placed on the teeth and then a light or laser is directed on them to activate the bleaching, this laser whitening method takes about an hour with immediate effects.

- First, a gel is applied to the gums which will harden into a rubber-like barrier, which will protect them from irritation and harm.
- Next, a whitening product is applied to each tooth, and heat generated by a laser enhances the whitening power of the hydrogen peroxide solution.

Package Content
